24th ANNUAL CONFERENCE

Women's Cancer Initiative-
Tata Memorial Hospital

THEME:

Gynaecological Cancers: Evidence meets Practice

Dear Colleagues,

On behalf of the organising committee we are delighted to invite you to join us for the **'24th Annual Conference of the Women's Cancer Initiative - Tata Memorial Hospital'** to be held from **October 08th - 11th, 2026 at Tata Memorial Hospital, Parel, Mumbai.**

The theme of the conference is

Gynaecological Cancers: Evidence meets Practice.

In recent years, the field of Gynecologic Oncology has undergone a transformative evolution, marked by significant advancements across various domains. From laboratory to the clinic, the landscape of gynecologic cancer care has been reshaped, offering new hope to patients worldwide. Despite these remarkable strides, the real-world implementation of these advancements remains a formidable challenge.

As we convene at the 24th Annual conference of the WCI, we recognize both the remarkable progress made and the challenges that lie ahead. Through dialogue, collaboration and shared expertise, we aim to bridge the gap between scientific innovation and real-world practice, while navigating the complexities of multidisciplinary care coordination and integrating new advancements into healthcare systems.

We have invited abstract submissions for both poster and oral presentations in the field of Gynecologic Oncology. Trainees are especially encouraged to join us and take part in an engaging lineup of workshops and academic discussions.

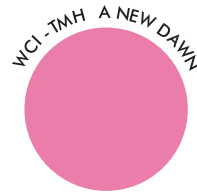

We expect about 300 oncologist to participate in this conference. We have planned various branding and scientific engagement opportunities for our sponsors. You can get in touch with us to discuss the sponsorship opportunities.

We look forward to your participation.

Learn from world leaders in Gynecologic Oncology

Prof. Jonathan Ledermann

MD, FRCP, FMedSci – UK

Professor of Medical Oncology

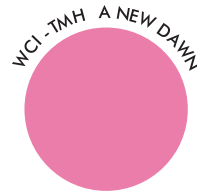

UCL Cancer Institute, University
College London (UCL), UK

Prof. Jonathan A. Ledermann is a distinguished medical oncologist and internationally recognised expert in gynaecological cancer, particularly ovarian cancer. He is Professor of Medical Oncology at the UCL Cancer Institute, University College London, and has dedicated more than three decades to advancing cancer research and clinical care.

His academic and clinical interests include ovarian and cervical cancers, targeted therapies, PARP inhibitors, DNA-repair mechanisms, immunotherapy and clinical trials. He has played a major role in several national and international studies that have contributed to changes in the management of gynaecological malignancies. He has been closely involved with the European Network of Gynaecological Trial Groups (ENGOT) and has previously served as Director of the Cancer Research UK & UCL Cancer Trials Centre.

Prof. Ledermann is widely recognised for his contribution to evidence-based oncology and international clinical research. In 2025, he received the International Gynaecological Cancer Society (IGCS) Lifetime Achievement Award for his outstanding contribution to gynaecological oncology.

Learn from world leaders in Gynecologic Oncology

Prof. Cyrus Chargari

Professor of Radiation Oncology
& Head of the Department of
Oncology-Radiotherapy

Pitié-Salpêtrière, AP-HP,
Paris, France

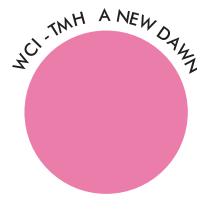

Prof. Cyrus Chargari is a leading radiation oncologist and internationally recognised expert in advanced radiotherapy and brachytherapy, with a particular focus on gynaecological cancers. He is Professor of Radiation Oncology and Head of the Department of Oncology-Radiotherapy at Hôpital Pitié-Salpêtrière, AP-HP, Paris.

His department provides comprehensive radiation oncology services using modern and innovative technologies, including advanced external-beam radiotherapy and specialised brachytherapy. The department has a particularly strong focus on gynaecological brachytherapy, including HDR and PDR techniques.

Prof. Chargari is actively involved in clinical research, academic education and the development of innovative radiation oncology techniques. His expertise encompasses gynaecological radiotherapy, brachytherapy, image-guided treatment, stereotactic radiotherapy and advanced radiation treatment technologies. He also contributes to postgraduate education and professional training in gynaecological oncology and brachytherapy.

His leadership at Pitié-Salpêtrière and contribution to modern radiation oncology have made him an important international voice in the advancement of precision radiotherapy and brachytherapy for cancer care.
